

2 - Limited Psychiatric Services

The INABC Risk Management Committee conducted a brief survey of Behavior Consultants to identify the top risk areas that impact the people to whom they provide Behavior Support Services. From these results, the RMC determined the goal of providing the membership with resources in the form of a “one-sheet” for the top risks identified on a quarterly basis.

Limited Psychiatric Services was identified as the second of the top risks that impact the people we support. In an effort to inform members of providers they may access in several areas across Indiana, here is a list of psychiatrists and Nurse Practitioners that members of INABC have provided:

Cummins Mental Health
